## ABOUT ME

From the moment I produce "Hello world" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, It offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello World" has become a full-fledged passion that only gets more and more exciting as the years go by.

## NOTABLE SKILLS

JavaScript (ES6+) TypeScript  
React Redux Webpack/Gulp  
Material UI Styled-Components  
Git/GitHub NodeJs NextJs  
Socket.io Express Bootstrap5  
React Native Tailwind CSS

## LANGUAGES

- French: Full Professional Proficiency.
- English: Full Professional Proficiency.
- Russian: Professional Working Proficiency

## WORK EXPERIENCE

### FRONT END ENGINEER

[HTTPS://NOFTGAMES.IO/](https://noftgames.io/) SEPT 2021 – JAN 2022

I worked in a growing team of 6 people, I was responsible for the front end part of the product. My job was mostly maintaining and adding new features to the product in collaboration with project owner, designer and backend developer.

The main technologies I worked with were javascript, react, nextjs, SASS and many more.

### FRONT END ENGINEER

[HTTPS://WWW.OLIVER.AGENCY/](https://www.oliver.agency/) JAN 2021 – AUG 2021

At OLIVER AGENCY, I worked in a team with 9 colleagues with different backgrounds (Designer, Copywriter, SEO manager ....)

I mostly worked with HTML5/CSS3 and native JavaScript, creating beautiful things like HTML5-banner, HTML5-Email, Promo-landing pages and also worked on websites like:

- <https://prostokvashino.ru/>
- <https://danissimo-club.ru/>

### FRONT END ENGINEER

[HTTPS://BIBLE.TEXTTREE.ORG/](https://bible.texttree.org/) SEPT 2019 – DEC 2020

I worked in a team of 6 developers to create a software that empower bible translators to translate more easily and accurately the bible in different languages. I was mainly focused on the front development and my responsibilities were:

- To create React components that fetch data from different APIs.
  - To fix bug in existing React components.
  - To add functionalities to existing React components.
  - To bundle different React components in order to get a finished and ready software. The finished product: <https://bible.texttree.org/>
- Tools used:

- JavaScript, React, Material UI, Styled Component, React Hooks, Node, Docker, Webpack
